

# DocSpot: Seamless Appointment Booking for Health

---

## 1. Introduction

Project Title: DocSpot: Seamless Appointment Booking for Health

**Team ID :** LTVIP2026TMIDS47812

**Team Leader :** Dandu Chandrika

**Team member :** Kommera Sujana

**Team member :** Kotte Hemalatha

**Team member :** Kodidela Maneesha

**Team member :** Mallam Bhavana

Overview:

DocSpot is a full-stack healthcare web application that streamlines the process of booking medical appointments.

It provides a user-friendly interface for patients to book appointments online, doctors to manage their schedules,

and administrators to oversee system operations. The app includes secure role-based logins and integrated online payments.

## 2. Project Overview

Purpose:

To provide a centralized, convenient, and secure platform for healthcare appointment management accessible by patients, doctors, and administrators.

Key Features:

- User (Patient) registration, login, and appointment booking

- Doctor login and appointment management dashboard
- Admin panel to manage users and appointments
- Razorpay integration for online payments
- Secure authentication using JWT

### **3. System Architecture**

Frontend (React.js):

- Built with React and React Router
- UI components from Material UI, Bootstrap, Ant Design
- Axios for HTTP requests
- Responsive design

Backend (Node.js + Express.js):

- RESTful API architecture
- Role-based access control
- Razorpay payment API integration
- JWT authentication

Database (MongoDB):

- Collections: users, doctors, appointments, admins, payments
- Mongoose for schema definitions and data modeling

### **4. Setup Instructions**

Prerequisites:

- Node.js (v18+)
- MongoDB (Local or Atlas)
- npm, Git

Setup:

```
git clone https://github.com/your-username/docspot.git
```

Frontend: cd

```
client npm
```

```
install
```

```
PS D:\FullStack\docspot-seamless-appointment-booking-for-health\Project File> cd frontend
PS D:\FullStack\docspot-seamless-appointment-booking-for-health\Project File\frontend> npm run dev

> frontend@0.0.0 dev
> vite

VITE v5.4.19 ready in 1122 ms

→ Local: http://localhost:5173/
→ Network: use --host to expose
→ press h + enter to show help
```

Backend: cd

```
./server
```

```
npm install
```

```
PS D:\FullStack\docspot-seamless-appointment-booking-for-health\Project File> cd backend
PS D:\FullStack\docspot-seamless-appointment-booking-for-health\Project File\backend> npm run dev

> backend@1.0.0 dev
> nodemon server.js

[nodemon] 3.1.4
[nodemon] to restart at any time, enter `rs`
[nodemon] watching path(s): ***!
[nodemon] watching extensions: js,mjs,cjs,json
[nodemon] starting `node server.js`
Server started on PORT:4000
Database Connected
```

.env file:

```
MONGO_URI=your_mongo_uri JWT_SECRET=your_jwt_secret
```

```
RAZORPAY_KEY=your_razorpay_key
```

```
RAZORPAY_SECRET=your_razorpay_secret
```

PORT=5000

## 5. Folder Structure

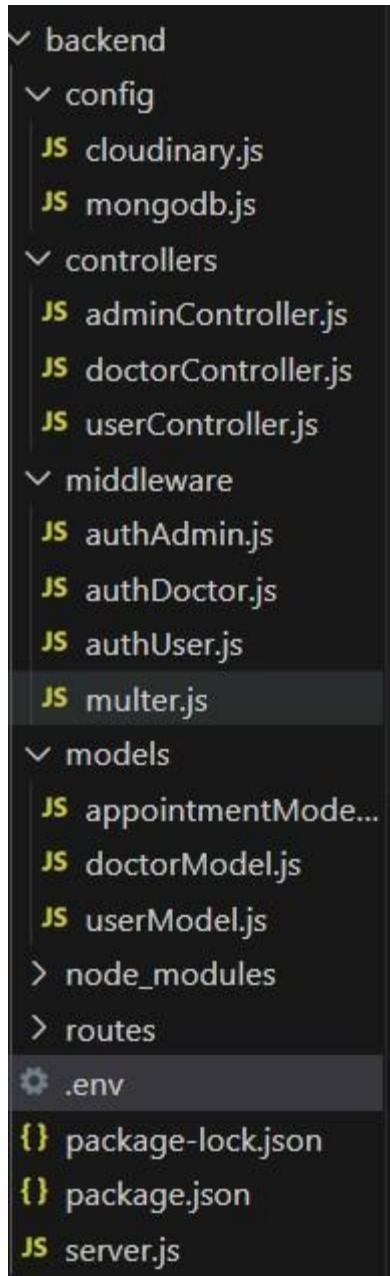

client/

```
├── public/

```

## 6. Running the Application

Frontend:

```
cd client npm
```

```
start
```

```
Backend: cd
```

```
server npm
```

```
start
```

## 7. API Documentation

POST /api/users/register - Register a new user

POST /api/users/login - Login as user

POST /api/doctors/login - Doctor login

POST /api/admin/login - Admin login

POST /api/appointments/book - Book an appointment

GET /api/doctors/:id/appointments - Doctor views appointments

GET /api/admin/appointments - Admin views all appointments

POST /api/payments/order - Initiate Razorpay order

POST /api/payments/verify - Verify payment

## 8. Authentication & Authorization

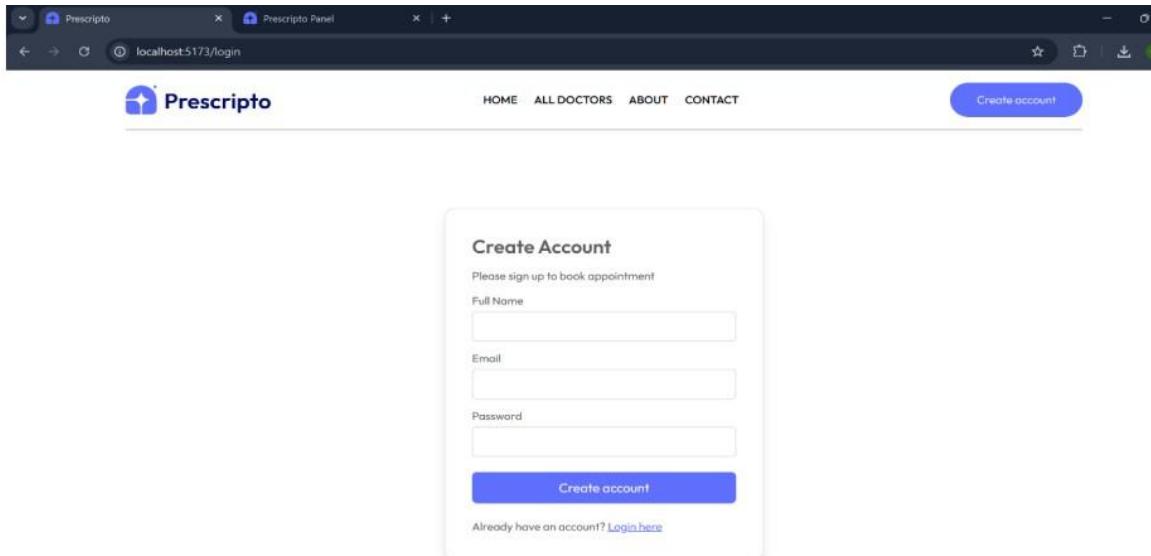

- JWT Tokens used for secure authentication

- Protected Routes: Based on roles (User, Doctor, Admin)

- Token Flow: On login, token is generated and stored in local storage. Every protected request includes this token in the headers.

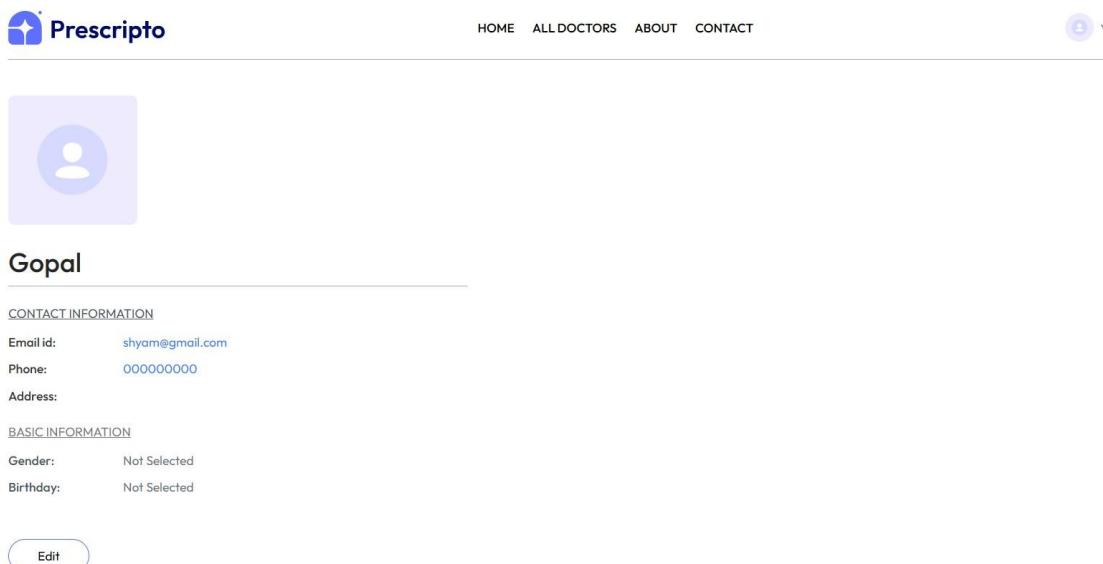

## 9. User Interface Screenshots

### User Login:

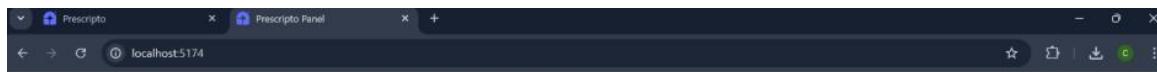

A screenshot of a web browser showing the 'Create account' form for Prescripto. The title bar shows two tabs: 'Prescripto' and 'Prescripto Panel'. The address bar displays 'localhost:5173/login'. The main content area features a logo for 'Prescripto' and a navigation bar with links for 'HOME', 'ALL DOCTORS', 'ABOUT', and 'CONTACT'. A blue button labeled 'Create account' is located in the top right corner of the content area. The central form is titled 'Create Account' and includes fields for 'Full Name', 'Email', and 'Password', each with its own input box. Below these fields is a blue 'Create account' button. At the bottom of the form, there is a link 'Already have an account? [Login here](#)'.

## User Dashboard:

A screenshot of the Prescripto user dashboard for a user named 'Gopal'. The dashboard header includes the 'Prescripto' logo and a navigation bar with 'HOME', 'ALL DOCTORS', 'ABOUT', and 'CONTACT'. On the left, there is a large purple placeholder image for a profile picture. The user's name, 'Gopal', is displayed in bold black text below the image. Underneath the name is a section titled 'CONTACT INFORMATION' containing fields for 'Email id' (shyam@gmail.com), 'Phone' (00000000), and 'Address'. Below this is a section titled 'BASIC INFORMATION' with fields for 'Gender' (Not Selected) and 'Birthday' (Not Selected). At the bottom left is an 'Edit' button.

## Admin Login Page:

## Admin Dashboard Page:

A screenshot of the Admin Dashboard page. The top navigation bar shows "Prescripto Admin". The dashboard includes a sidebar with links for Dashboard, Appointments, Add Doctor, and Doctors List. The main area displays statistics: 16 Doctors, 4 Appointments, and 1 Patient. Below this is a section titled "Latest Bookings" listing four entries: DR . Nandini Reddy (Completed), DR . Surya (Cancelled), DR . Sudharshan Reddy (Completed), and DR . Sushmitha (Cancelled).

Booking Details	Status
DR . Nandini Reddy Booking on 26 Jul 2025	Completed
DR . Surya Booking on 1 Aug 2025	Cancelled
DR . Sudharshan Reddy Booking on 25 Jul 2025	Completed
DR . Sushmitha Booking on 25 Jul 2025	Cancelled

## Doctor Login Page:

## Doctor Dashboard:

A screenshot of a web browser window titled "Prescripto Dashboard Panel". The address bar shows "localhost:5174/doctor-profile". The page features a sidebar with "Dashboard", "Appointments", and "Profile" buttons, where "Profile" is highlighted. The main content area shows a profile picture of Dr. Nandini Reddy, her title "DR . Nandini Reddy", her qualification "MBBS - General physician 4 Year", and a detailed "About" section. It also lists her appointment fee ("Appointment fee: ₹ 750"), address ("Address: Flat-21, Sree Complex, 12th Main, Indiranagar, Bangalore - 560038"), and a checked "Available" status with an "Edit" button.

## Appointment Booking:

 Prescripto[HOME](#) [ALL DOCTORS](#) [ABOUT](#) [CONTACT](#)

#### My appointments

**DR . Nandini Reddy**

General physician

Address:

Flat-21, Sree Complex, 12th Main,  
Indiranagar, Bangalore - 560038

Date &amp; Time: 26 Jul 2025 | 10:30 AM

Completed

**DR . Surya**

General physician

Address:

Flat-9, MG Layout, 2nd Cross,  
Indiranagar, Bangalore - 560038

Date &amp; Time: 1 Aug 2025 | 11:00 AM

Appointment cancelled

**DR . Sudharshan Reddy**

General physician

Address:

1st Cross, 1st Stage,  
Indiranagar, Bangalore - 560038

Date &amp; Time: 25 Jul 2025 | 03:00 PM

Completed

**DR . Sushmitha**

General physician

Address:

Flat 5, Vasanth Enclave, 5th Main,

## 10. Testing

### Tools Used:

- Postman (API testing)
- Lighthouse (Frontend performance)
- Browser DevTools

### Coverage:

- User login/logout and protected routes
- Doctor and admin access control
- Appointment conflict handling
- Payment success/failure scenarios

## 11. Demo or Showcase

Screenshots: As listed above

Demo Video: [Insert YouTube/Google Drive demo link]

## **12. Known Issues**

- No pagination for appointment list
- Doctor profile editing not implemented
- No email/SMS notifications yet

## **13. Future Enhancements**

- Implement video consultations via WebRTC or Jitsi
- Add appointment filtering (by date/speciality)
- Notifications for appointment reminders
- Email confirmations for patients
- Real-time availability for doctors

## **14. Conclusion**

DocSpot successfully integrates frontend and backend technologies to deliver a secure and user-friendly platform for medical appointment management.

With online payments and role-based control, it lays the groundwork for scalable future enhancements in digital healthcare.
